PROFESSIONAL SUMMARY

SOC Analyst with hands-on 24/7 Security Operations Centre (SOC) experience investigating **500+ security alerts**, including **phishing**, **malware**, and endpoint-based threats, using **Splunk SIEM**, **SOAR**, **ServiceNow**, and **Microsoft Defender XDR**. Skilled in **analyzing endpoint** and **network logs** to identify **indicators of compromise**, correlating findings with KQL and SPL, and conducting proactive threat hunts aligned with the **MITRE ATT&CK** framework. Supported post-incident reviews by combining strong analytical skills with clear, customer-focused communication to translate technical findings to stakeholders.

EXPERIENCE

Digital Technology Intern | Baker Hughes

July 2025 – July 2026

- **Triaged 500+ security alerts** using Microsoft Defender XDR, investigated root causes, and escalated confirmed threats to ensure continuous security.
- **Performed proactive threat hunts** across log sources, mapping adversary activity to the MITRE ATT&CK framework, profiling threat actor behaviour, and strengthening detection coverage.
- **Leveraged KQL and SPL** to query and correlate log data across multiple sources during investigations, improving detection accuracy and reducing time to identify emerging threats.
- **Conducted malware analysis** using sandboxing tools on suspicious files, accurately identifying true-positive incidents and enhancing incident response.
- **Liaised with stakeholders** to communicate technical issues and manage expectations, keeping stakeholders informed throughout incident resolution.
- **Delivered structured SOC training** on workflow, tooling, and standard procedures for 4 colleagues, improving onboarding consistency and reducing time to competency.

Tutor (Self-Initiated)

Nov 2024 – Dec 2024

- **Delivered hands-on training** sessions covering vulnerability assessment and penetration testing concepts and tools, simplifying complex IT concepts for non-specialist learners.
- **Executed structured vulnerability assessments** to identify security flaws, applying a methodical, prioritised approach to fault diagnosis and problem-solving.

EDUCATION

BSc (Hons) Cybersecurity | Teesside University

Sept 2023 – May 2025

- **Modules: 1st Class Grade** in Ethical Hacking, System Administrator, Network Infrastructure, CIS Cyber, Information Security Management
- **Final Year Project:** Facial Recognition Attendance System using AI & Machine Learning

Higher Diploma in IT & Cybersecurity | MDIS

Aug 2022 – Mar 2023

- **Modules:** Distinction in Object-Oriented Programming, Database Systems, Operating Systems, Ethical Hacking and Countermeasure, Computer Hacking & Forensics Investigation, Computer Security Incident Handling

Short-Term Course | National University of Singapore

Dec 2022 – Mar 2023

- **Module:** Distinction in Programming with Python, covering Python syntax, data structures, and scripting fundamentals, with applications in automation and data analysis projects.

SKILLS

Technical Skills: Splunk SIEM, Splunk SOAR, ServiceNow, Microsoft Defender XDR, Microsoft Intune, Abnormal, Splunk Attack Analyzer, MITRE ATT&CK Framework, Cyber Kill Chain, Google Threat Intelligence, Kusto Query Language (KQL), Splunk Processing Language (SPL), Networking Fundamentals, Microsoft 365

Soft Skills: Effective communication, Analytical problem-solving, Cross-functional teamwork, Stakeholder management
