PROFESSIONAL SUMMARY

SOC Analyst with hands-on 24/7 Security Operations Centre (SOC) experience investigating **500+ security incidents**, including **phishing**, **malware**, and endpoint-based threats, using **Splunk SIEM**, **SOAR**, **ServiceNow**, and **Microsoft Defender XDR**. Skilled in **analyzing endpoint** and **network logs** to identify **indicators of compromise**, correlating findings using **KQL** and **SPL**, and conducting proactive threat hunts mapped to the **MITRE ATT&CK** framework. Supported post-incident reviews by combining strong analytical skills with clear, customer-focused communication to translate technical findings to stakeholders.

EXPERIENCE

Digital Technology Intern | Baker Hughes

July 2025 – July 2026

- **Triaged 500+ security alerts** in Microsoft Defender XDR, investigated root causes, and escalated confirmed threats to ensure continuous security and business continuity.
- **Conducted malware and sandbox analysis** using Splunk Attack Analyzer and VirusTotal on suspicious files, domains, and URLs, accurately identifying true-positive incidents and improving incident response.
- **Conducted independent and proactive threat hunts** across log sources, mapping adversary activity to the MITRE ATT&CK framework to profile threat actor behaviour and strengthen detection coverage.
- **Leveraged KQL and SPL** to query and correlate log data across multiple sources during threat hunts and SOC alert investigations, improving detection accuracy and reducing time to identify emerging threats.
- **Liaised with internal stakeholders and customers** to communicate technical issues clearly, manage expectations, and keep users informed throughout incident resolution, translating technical detail for non-specialist audiences.
- **Delivered structured SOC training** on workflow, tooling, and standard procedures for 4 colleagues, improving onboarding consistency and reducing time to competency.

Tutor (Self-Initiated)

Nov 2024 – Dec 2024

- **Delivered hands-on training** sessions covering vulnerability assessment and penetration testing concepts and tools, simplifying complex IT concepts for non-specialist learners.
- **Conducted structured vulnerability assessments** to identify security flaws, applying a methodical, prioritised approach to fault diagnosis and problem-solving.

EDUCATION

BSc (Hons) Cybersecurity | Teesside University

Sept 2023 – May 2025

- **Modules: 1st Class Grade** in Ethical Hacking, System Administrator, Network Infrastructure, CIS Cyber, Information Security Management
- **Final Year Project:** Facial Recognition Attendance System using AI & Machine Learning

Higher Diploma in IT & Cybersecurity | MDIS

Aug 2022 – Mar 2023

- **Modules:** Distinction in Object-Oriented Programming, Database Systems, Operating Systems, Ethical Hacking and Countermeasure, Computer Hacking & Forensics Investigation, Computer Security Incident Handling

Short-Term Course | National University of Singapore

Dec 2022 – Mar 2023

- **Module:** Distinction in Programming with Python, covering Python syntax, data structures, and scripting fundamentals, with applications in automation and data analysis projects.

SKILLS

Technical Skills: Splunk SIEM, Splunk SOAR, ServiceNow, Microsoft Defender XDR, Microsoft Intune, Abnormal, Splunk Attack Analyzer, MITRE ATT&CK Framework, Cyber Kill Chain, Google Threat Intelligence, Kusto Query Language (KQL), Splunk Processing Language (SPL), Networking Fundamentals, Microsoft 365

Soft Skills: Effective communication, analytical problem-solving, cross-functional teamwork, stakeholder management
